

FRIUL INTAGLI: A SUCCESS ON MULTIPLE FRONTS!

FRIUL INTAGLI, your partner in furniture components

For more than 40 years **Friul Intagli**, a company based in Friuli (Italy), has been the pulsing hub for broad-based projects for managing and producing materials, components, finishings, technologies and products. Since 2004, it has been growing exponentially, such that in 5 years the number of employees has more than doubled.

BRANCH

Furniture.

PROBLEM

Frequent exchange of large quantities of data, both commercial and logistical, with an important international partner.

REQUEST

For this reason, Friul Intagli searched for a solution to **exchange data in an electronic format**, which could be integrated with the new ERP AX, but wouldn't involve its IT team excessively and that would allow more users to work simultaneously.

SOLUTION

DERWID proposed an **outsourced** service: the solution doesn't require the installation of any software and allows **more users** to work simultaneously. **D/cct** - DERWID's solution for electronic data interchange, **integrates perfectly with the new ERP AX** as well as automating the exchange of its commercial (orders, invoices,...) and logistical (IftMbc, IftMbf, ...) documents, which were previously configured and then transformed into the format of Friul Intagli's partner.

BENEFITS

With DERWID's solution, Friul Intagli has **automated essential processes** for its company efficiency, **improving the organization and saving considerably, both in terms of time and of costs**. Almost all of its clients were then involved in the new electronic exchange of data.
